Imperatori Sistemi Automatici

di Davide Imperatori

Descrizione

Questa serie di filtri tarabili in tecnologia stripline permette di disporre sempre di filtri con la frequenza centrale più adatta alle vostre applicazioni.

Eseguendo delle piccole incisioni sulla microstriscia (alle distanze segnalate) sarà possibile realizzare un filtro stop-band alla frequenza desiderata in maniera semplice ed economica.

Description

This series of calibratable filters in stripline technology always allows you to filter with the central frequency that best suits your applications.

By making small incisions on the microstrip (at the distances indicated) it will be possible to create a stop-band filter at the desired frequency in a simple and economical way.

Specifiche

- ***Notch tarabile fra 500MHz - 3GHZ***
- ***Costo estremamente basso***
- ***Semplici da utilizzare***
- ***Frequenza tarabile con un taglierino***
- ***Attenuazione superiore ai 15dB al notch***

Specifications

- ***Tunable between 500MHZ and 3GHz***
- ***Extremely low cost***
- ***Simple to use***
- ***Center frequency tunable with a cutter***
- ***Attenuation greater than 15dB at notch***
